Dane Crisis Provider Network
Supervision/Clinical Consultation Log

Quarter/Year:

Staff Name:

Agency Name:

All crisis service providers must receive clinical supervision or engage in peer clinical consultation consistent with requirements under DHS 34. The requirement for each staff member depends upon their qualifications, as laid out in DHS 23.21(7)(d-e). Service providers who have not had 3000 hours of supervised clinical experience or who are not qualified under DHS 34.21(3)(b) 1 to 8 must receive a minimum of one hour of clinical supervision per week or for every 30 clock hours of face to face mental health services delivered. The default should be one hour per week unless actual documentation of logged hours justifies less supervision, or requires more.
